Health Shake

Take the guesswork out of eating right and achieve your ideal weight with Synergy SLMsmart™ Health Shake. This delicious shake mix offers more benefit per sip with nutrient-rich, smart calories that instantly fuel your body and keep it running at high efficiency for hours.

BENEFITS

- Delivers a balanced array of carbohydrates, fats, and protein for time released energy
- Keeps you feeling full for up to four hours
- Supports lean muscle mass
- Little-to-no glycemic effect (raising blood sugar) after consumption

KEY INGREDIENTS

- *Time-released Protein Blend* — featuring three protein sources, whey, soy and casein, this blend has been formulated to assure a true time-release. This can promote satiety for up to four hours. The amino acids from whey protein appear in the blood almost immediately after consumption. Those from soy protein are next, as soy protein has been shown to be a “medium-release” facilitating longer term distribution of the amino acids. The amino acids from casein appear last.

- *Time-released Energy Blend* — the healthy carbohydrates and fat found in Synergy SLMsmart Health Shake have been specifically added and formulated to allow energy to be released at different time intervals. For carbohydrates, fast-releasing energy has been included in the form of maltodextrin, and slower-releasing energy in the form of fructose. For fat, some comes as fast releasing energy from medium-chain triglycerides and some as slow-releasing energy from sunflower and canola oil. With these time-released sources of energy, you feel satisfied until the next meal.
- *Vitamin Mineral Blend* — containing the essential nutrients normally found in a balanced meal, Health Shake is able to act as a true meal replacement by offering this blend.

RECOMMENDED USE

Mix three (3) rounded scoops into 10 ounces of milk or water.

FREQUENTLY ASKED QUESTIONS

I've heard good and bad opinions on soy protein. Why has it been included in this Health Shake?

Muscles need a constant supply of amino acids throughout the day to avoid degradation, and this is especially important when calorie intake is reduced. The unique blend of proteins in Health Shake (whey, casein, and soy) release amino acids sequentially into the blood. This not only keeps you feeling full, but also bathes the muscles with a constant supply of amino acids and protein. In this way, muscle mass is better maintained than just taking a single protein like whey protein.

Soy protein in this blend and dosage is safe and well tolerated, and actually beneficial for health conscious men and women. Any estrogenic benefits associated with the soy content of Health Shake have not been shown to affect male hormone levels. Men can safely use Health Shake and obtain all the health benefits of soy protein without worry of modulating male hormone levels.

Can I replace more than one meal per day with Health Shake?

Yes. Due to its great taste and convenience, you may wish to substitute up to two meals per day with Health Shake.

How much weight can I expect to lose on Synergy's SLMsmart weight management program?

Over the course of 90 days, you can expect to lose at least 10% of your body weight, which is considered a healthy rate for weight loss, optimal for long term results.
